DETAILED ACTION

1. This action is responsive to the application filed on 10/15/98.

This action is made Non-final.

2. Claims 1-15 are pending in the case. Claims 1, 6, and 11 are independent claims.
3. The Examiner understands that this invention is directed towards a method, apparatus, and computer-readable code for the stopping and resuming of the download of HTML document, which include both textual, and graphical objects

Drawings

4. This application has been filed with informal drawings which are acceptable for examination purposes only. Formal drawings will be required when the application is allowed.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

6. Claims 1, 6, and 11 are rejected under 35 U.S.C. 102(e) as being anticipated by Angiulo et al, hereinafter Angiulo (Pat.# 6,275,829 B1, 8/14/2001, filed on 11/25/97).

Regarding independent claim 1, Angiulo discloses a method for controlling the display of an HTML document (having text, and image(s)) by the selection of thumbnail(s) representation

of the image(s) in order to display the image in a second HTML document (col.12, lines 20-67, and fig. 6-7).

Furthermore, Angiulo discloses the *display of an HTML document* (having text, and image(s)), and the selection of thumbnail(s) representation of the image(s) in order to display the image in a second HTML document *in response to a user interest, and action* (col.12, lines 20-67, and fig. 6-7).

Claims 6 is directed towards an apparatus for controlling, and implementing the steps found in claim 1, and is similarly rejected.

Claim 11 is directed towards a computer program product having computer program code for storing the steps found in claim 1, and is similarly rejected.

Claim Rejections - 35 USC § 103

7. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

8. Claims 2-5, 7-10, and 12-15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Angiulo, in view of Stone et al, hereinafter Stone (Pat. # 6,101,510, 8/8/00, filed on 1/29/97).

Regarding claim 2, which depends on claim 1, Angiulo discloses a method for controlling the display of an HTML document (having text, and image(s)) by the selection of thumbnail(s)

representation of the image(s) in order to display the image in a second HTML document (col.12, lines 20-67, and fig. 6-7).Angiulo fails to explicitly disclose: *halting displaying of said image file after halting displaying said image*. However, Stone teaches the halting of HTML pages using a stop interface command (col. 6, lines 40-44). It would have been obvious to a person of ordinary skill in the art at the time of the invention to have combined the teachings of Angiulo and, Stone because Stone teaches above the stopping of the navigation of undesired web pages by a user.

Regarding claim 3, which depends on claim 2, Angiulo discloses a method for controlling the display of an HTML document (having text, and image(s)) by the selection of thumbnail(s) representation of the image(s) in order to display the image in a second HTML document (col.12, lines 20-67, and fig. 6-7).Angiulo fails to explicitly disclose: *resuming displaying said image file after halting displaying said image file*. However, Stone teaches the resuming of displaying HTML pages using a refresh command, after having used a stop interface command (col. 6, lines 35-44). It would have been obvious to a person of ordinary skill in the art at the time of the invention to have combined the teachings of Angiulo and, Stone because Stone teaches above the refreshing or begin again the downloading of portions web pages by a user.

Claims 4-5 are directed towards a method for implementing the steps found in claims 2-3 respectively, and therefore are similarly rejected.

Claims 7-10 are directed towards an apparatus for implementing the steps found in claims 2-3, and 2-3 respectively, and therefore are similarly rejected.

Art Unit: 2176

Claims 12-15 are directed towards a computer program product having computer program code for storing the steps found in claims 2-3, and 2-3 respectively, and therefore are similarly rejected.

Conclusion

I. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. BERLIN et al. (Pat. # 5,915,093), HANSEN (Pat. # 6,128,759), ALLEN et al.
